Accelerate your life. With the new Alto K10.

Be game for everything that life has to offer with the all-new zippy Alto K10. It's big on style. It's big on comfort. It's a big statement. It's a way of life that's zippier than ever. The Alto K10 sports a bold new demeanour that inspires confidence. At the heart of this pursuit machine is a lightweight, yet powerful K10B engine that speeds-up your life. With its elegant aesthetics and easy manoeuvrability, the new Alto K10 is here to be your life's accelerator and help you cross many more milestones in the car's illustrious history.

Accelerate your style.

The head-turning looks of the new Alto K10 sport a bold new design. The sharp aerodynamic lines running on the side add to the sportiness of the car. The stunning looks exude confidence and as for the onlookers, one look just won't be enough.

Accelerate in comfort.

Thanks to the flowing curves in the all new Alto K10, the interiors get a wider feel. The energetic lines on the dash and exciting play of surfaces make the interior of the car a lot sportier. Thoughtfully designed seats give passengers that extra legroom for that extra comfort to enjoy the ride.

Technology accelerated.

Driving an Alto K10 is an experience that's next to none. Its unmatched performance and outstanding mileage will make any chase in your life an unforgettable journey. So move ahead and get ready to chase life in an Alto K10.

Accelerate with power.

At the heart of this machine is a lightweight, yet powerful 1.0 litre K10B engine. The advanced gear system, drive by wire technology coupled with the 50kw power makes for an exhilarating drive.

With several innovations and enhancements like optimised compression ratio, reduced frictional losses, low viscosity engine oil and redesigned valves & springs lead to high fuel efficiency.

The airbags are shown inflated for informational purposes only.

Options to accelerate safety.

SRS (Supplemental Restraint System) dual front airbags mitigate the impact to the driver and front passenger in the event of a frontal collision.

In an emergency braking situation, Anti-lock Brake System (ABS) keeps tyres from locking up and adds stability to evasive manoeuvres. In addition, Electronic Brake force Distribution (EBD) helps maintain control by sending the optimum amount of force to the front and rear wheels.
